

CRYPTOSIZ

Software Engineer and Web3 Marketer

Cryptosizglobal@gmail.com | +2347061506374 | cryptosizdev.vercel.app

SUMMARY

Blockchain Developer | AI Engineer | Ethical Hacker | Web3 Growth Strategist

Building secure, scalable, and innovative digital products across blockchain, artificial intelligence, and cybersecurity. Experienced in smart contract development, decentralized applications (dApps), AI-powered automation, penetration testing, and Web3 marketing. Focused on delivering high-impact solutions that combine cutting-edge technology with measurable business results.

WORK EXPERIENCE

Blockchain developer, Memesweeper

Jan 2026 – Present

- Develop a token scanner to determine if it is safe to be traded
- Built presal smartcontract on solana
- Built the full telegram bot and web platform.

AI Engineer, Awari

Jan 2024 – Sept 2025

- Develop powerful chatbots and hooks using generative ai
- Design image analysis models using OpenCV
- Built personal assistance ai
- Develop algorithms to help the almost dumb heard using voice synthesis models
- used machine learning, deep learning and cns to improve and solve problems

Ethical Hacker, Chris security audits

Apr 2023 – Dec 2023

- Perform penetration tests, analyse bugs and vulnerability on platforms.
- Use wireshark and metasploit to audit.
- .Implement offensive attack to recover lost information and to get information from sources

EDUCATION

Blockchain Developer

Jan 2022 – May 2023

Dapp University

AI engineering and Automation

April 2022 – Dec 2022

Coursera and Microsoft Learn

Certified Ethical Hacker

Feb 2024 – Dec 2025

EC-Council

KEY SKILLS

- Smart Contract Development
- Solana, Ethereum and Sui tech
- Token launch
- Defi and Dao protocol design
- NFT and token launch
- Solidity, Hardhat, Foundry, Web3.js
- Solana, rust, anchor, wagmi
- React, Nextjs, Typescript, Nestjs
- Node.js, Express, mongo, prisma
- Github, Git, CI/CD, Docker
- MySQL, MongoDB, PostgreSQL
- Burp suite, Nessus, Blood Hound
- web3 growth marketing
- community growth
- Machine and Deep Learning
- OpenCV, generative AI
- Pandas and Numpy, scikit
- Llamaindex, Langchain
- Penetration testing
- Offensive security, Owasp
- wireshark, metasploit, Nmap
